HWG Sababa

Y Cyber

HWG Sababa's business unit dedicated to industrial cybersecurity — a global provider of OT cybersecurity solutions and services, fully focused on protecting industrial environments.

Operating at the intersection of cybersecurity and safety, Y Cyber delivers resilient, proactive and tailored solutions to industrial operators, technology vendors and service providers worldwide.

OT clients in 16 countries

250 OT projects in 5 years

120+ years of combined OT experience

Space, Defence & CTI

HWG Sababa

Business Unit since 2026

Advanced cybersecurity and intelligence capabilities for mission-critical environments, from Cyber Threat Intelligence to advanced analysis and operational support for defence, law enforcement and the aerospace sector.

Combining field experience with international partnerships to protect critical infrastructure and strengthen resilience and national security.

- Office in Rome
- Extended expert team
- EU Hackathon winners
- National security projects

HyperSOC®

HWG Sababa

We manage cybersecurity around our customers' business needs, continuously reducing risk, strengthening resilience and improving security performance.

SERVICE PORTFOLIO

Managed Detection & Response	Offensive Services	Governance, Risk & Compliance	AI Security	Cloud Security	Identity Security
Data Security & Resilience	Intelligence Services	OT Security	CTEM	Purple Team	Perimeter Security

BUILT ON HyperSOC®

Pulse™ — OPERATIONS

- Proprietary hyperautomation and API gateway with data normalization
- Over 340 customized use cases and a proprietary detection logic layer
- Codified processes, playbooks and procedures
- Portal with real-time risk updates

OneTeam — PEOPLE

- One multidisciplinary team covering security, infrastructure, networking, offensive security and GRC
- The same experts who engineer detection logic also manage incident response
- One service manager, one escalation path, one point of accountability

Signal — INTELLIGENCE

- Proprietary intelligence platform with connectors, data normalization and a validated database
- Open-source, commercial and proprietary intelligence sources integrated into a unified model
- Powered by our Space, Defence & CTI BU

Service portfolio

HWG Sababa

AI Security
Workforce · Guardrails · AI Red Teaming

Identity Security
IAM/IGA · PAM · ITDR · MFA · Machine Identity

Cloud Security
CNAPP · SSE · SaaS · Cloud Detection & Response

Data Security & Resilience
DSPM · DLP · Immutable Backup · Recovery

CTEM
Discover · Prioritise · Validate · Mobilise

Purple Team
SOC Assessment · Detection Engineering Validation

Governance, Risk & Compliance
NIS2/DORA/CRA · vCISO · Crisis Management · CSIRT

Intelligence Services
CTI · DRP · Supply Chain · Executive Intelligence

Managed Detection & Response
SOCaaS · MDR · Incident Response

Perimeter Security
SASE · ZTNA · NOC · Email & Network

Offensive Services
VAPT · Red Teaming · ACN-accredited Test Lab

OT Security
IEC 62443 · OT SOC · Managed OT

Digital Sovereignty
Team di delivery basati in UE e residenza dei dati in UE per l'intero portfolio. Tecnologie europee o on-premise, dove disponibili soluzioni mature.

Pulse™ OPERATIONS

OneTeam PEOPLE

Signal INTELLIGENCE

One journey. Every capability.

HWG Sababa

Wherever the conversation starts, the delivery journey remains consistent: we advise, design, integrate, operate and continuously improve cybersecurity around the customer's business priorities. Instead of disconnected services, you get one operating model that can evolve over time as your business evolves.

ADVISE & GOVERN

Understand business priorities, assess cyber risk and define the operating model.

DESIGN & BUILD

Design secure architectures and implement the capabilities needed for long-term resilience.

INTEGRATE & MANAGE

Integrate technologies, processes and governance into day-to-day operations.

DETECT & RESPOND

Operate continuous monitoring, cyber defense and incident response.

RECOVER & SUSTAIN

Continuously improve resilience, strengthen recovery capabilities and evolve the operating model.

Recognized as a global player.

HWG Sababa

HWG Sababa Named a **Major Player**

in the IDC MarketScape: Worldwide MDR Service for Midmarket 2026

"Organizations in critical infrastructure, energy, defense, or industrial sectors, particularly those operating across converged IT and OT environments in European or Middle Eastern markets, seeking a managed security partner with deep sectoral expertise and specialized OT detection and response capabilities should evaluate HWG Sababa's HyperSOC™ MDR offering."

IDC

Source: IDC, 2026

*Il modello di analisi dei vendor di IDC MarketScape è progettato per offrire una panoramica della competitività dei fornitori ICT in uno specifico mercato. La metodologia di ricerca utilizza un rigoroso sistema di valutazione basato su criteri sia qualitativi sia quantitativi, che restituisce una rappresentazione grafica unica del posizionamento di ciascun vendor nel mercato di riferimento. Il punteggio Capabilities misura il prodotto, il go-to-market e la capacità di execution del vendor nel breve termine. Il punteggio Strategy misura l'allineamento delle strategie del vendor con le esigenze dei clienti su un orizzonte temporale di 3-5 anni. La quota di mercato del vendor è rappresentata dalla dimensione dei cerchi. Il tasso di crescita anno su anno del vendor rispetto al mercato di riferimento è indicato da un simbolo positivo, neutro o negativo accanto al nome del vendor.

Technology-agnostic by design.

HWG Sababa

We work with leading vendors, integrating the right capabilities into each customer's environment, maximizing the value of existing investments .
